

PROTECTED BY

MAGSHIELD®

THE NEW STANDARD IN PRECISION OIL SAMPLING

MAG-SAMPLE® PRO

Mag-Sample®PRO is a **safer, cleaner, and more reliable oil sampling solution**. Designed to **protect personnel and equipment**, and ensure **confident, efficient, and safe sampling** every time.

Its **self-sealing design** prevents **spills and contamination**, while the **consistent deep sampling** eliminates **variability** and reduces the need for **resampling**.

"Keeping nearly a thousand pieces of mining machinery operating required the best reliability strategies available. Here's why we made MAGSHIELD® an integral part of our mobile equipment fleets."

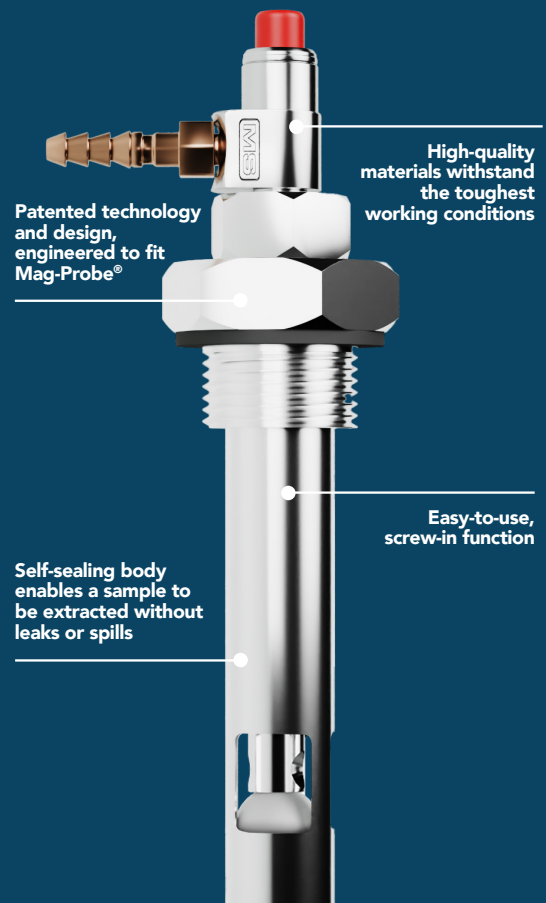

Mike Hynes, Superintendent of Reliability, North American Construction Group

Every oil sample tells a story. **Mag-Sample®PRO** ensures it's the right one.

- **Simplified Process:** Fewer steps, greater efficiency, saving time and costs
- **Clean Sampling:** Self-sealing design maintains purity and blocks contaminants
- **Accurate Sampling:** Consistent process and sample depth minimise sample outliers and resampling
- **Enhanced Safety:** Reduces exposure to hot oil and spills
- **Robust Construction:** Built for durability and performance in tough environments

MAG-SAMPLE®PRO DELIVERS:

- ✓ **Safer, cleaner and controlled** sampling to protect your team
- ✓ **More accurate oil samples** reflecting true system conditions
- ✓ **A fast efficient process** to save time and money
- ✓ **Minimise resampling** with consistent depth and precision

MAGSHIELD®

HOW MAG-SAMPLE®PRO WORKS:

Mag-Sample®PRO works exclusively with MagShield's Mag-Probe®, a self-sealing diagnostic product that ensures a secure, contamination-free sampling environment.

- ✓ **Screws directly into the Mag-Probe®** body, reopening access to the oil compartment while keeping the environment sealed.
- ✓ **Press the red button to draw oil directly into the sampling container** clean, efficient, and simple.
- ✓ Once the sample is taken, simply **unscrew Mag-Sample®PRO to reseal the system** and return the probe body.

MAG-SAMPLE®PRO IN ACTION:

1

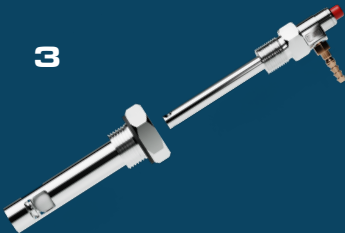

Mag-Probe®

2

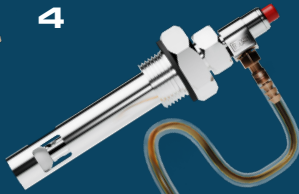

Detach the probe from the Mag-Probe® body

3

Simply screw the Mag-Sample®PRO into the Mag-Probe® body

4

Enable oil to freely flow into the sample bottle

BENEFITS OF THE MAG-SAMPLE®PRO

Enables oil to freely flow into the sample bottle

Employee safety

Precision sampling

Easy to use

Saves valuable time and money

Eco-friendly design
