**LEADING THE WAY IN A THRIVING  
AGRICULTURAL COMMUNITY!**

# SSGA & YOUNG'S

Between now and December 31st, 2023 active Members of the SSGA will receive a **\$1,250 Young's Equipment Gift Card** for Parts and/or Service at any Young's Equipment location with the purchase of any of the following new units:

- Case IH MFD Loader Tractor (60-185 HP)
- Case IH RB565 Round Baler
- NDE Vertical Mixer
- Highline \*NEW\* BP60 series Bale Pro®

In addition to that, **we will donate \$250 per unit sold** to the Saskatchewan Stock Growers Association to support their formidable cause.

# CUSTOMER AND COMMUNITY SERVICES

Young's has a commitment to providing excellence in customer service and actively supports the customers and communities we serve through several initiatives.

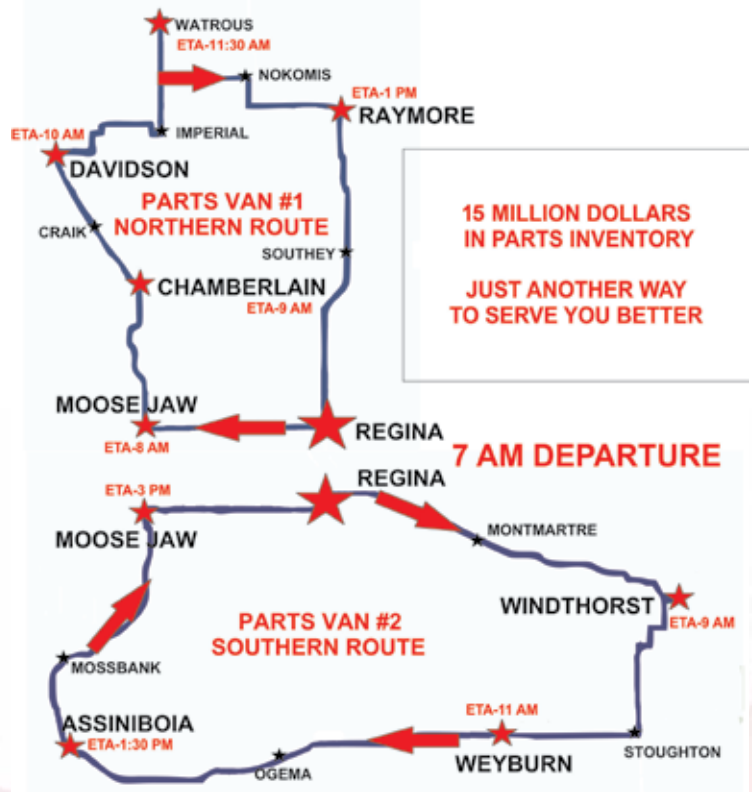

## Rotor Barbeques

Young's has combine rotors which have been converted into propane BBQs. They are available free of charge for use at your function! BBQ is easily transported with a 2" hitch ball. Call your closest Young's branch to reserve one for your event.

## Parts Transfer Trucks

Young's Equipment has two Transfer trucks that run Northern and Southern routes which begin at our head office in Regina at 7am everyday throughout the growing season. This allows Young's part staff to draw from the inventory of all nine stores. Most parts will arrive within 1 day of ordering. Drivers are able to drop off at set locations along the route if requested. Contact your local Young's Equipment store for more details.

## NO FREIGHT CHARGES ON TRANSFERS

# MY YOUNG'S EQUIPMENT

Version 2021-05-28

**MY YOUNG'S EQUIPMENT**  
YOUR 24/7 ACCESS TO  
YOUNG'S EQUIPMENT.  
SIGN UP FOR FREE.

We are proud to be able to introduce the **MyYoungsEquipment customer portal** to you, the around-the-clock access to your account and equipment information. MyYoungsEquipment is a web-based tool that provides real value at no cost to you and your operation. Your MyYoungsEquipment access gives you a sleek, modern and easy to use interface with a secure environment. All of your information with Young's Equipment is at your fingertips and editable anytime.

In the **"My Equipment"** section we store valuable information about your machines. Information that is shared with only our staff and can be updated by you or us anytime. If you acquire a new treasure you can easily add it to your MyYoungsEquipment profile or if you no longer own it, remove it, which makes your conversation with us much easier when it comes to service for your machine and the processes more fluent.

Not only does the **"Parts"** section of MyYoungsEquipment allow you to order parts directly from your preferred Young's Equipment location, but you can even save shopping lists and order them for reoccurring purchases whenever you need the parts without having to memorize part numbers or to look them up all over again. For the machines in your shed a filter list in MyYoungsEquipment is a must-have tool that saves time and hassle. But of course your MyYoungsEquipment access gives you the opportunity to directly look up parts as well. Currently the portal links directly to CaseIH, Bourgault and Seedhawk/Vaderstad parts books and we are constantly working on adding more vendors to that list.

In the **"My Account"** section you will find all past and current parts invoices as well as a handy Tax Summary. You can select, download or email any invoice or statement you're interested in. If someone misplaces an invoice, no more wait time until we send it to you, it's now available anytime for you. Last but not least, you can contact any department you'd like to communicate with at any given time, even long past opening hours by clicking on the envelope in the top right corner.

MyYoungsEquipment is completely free for you, to take advantage of all the perks it offers. Simply visit [www.youngs.ca](http://www.youngs.ca) and click on **"Sign Up"** on the very top of our homepage. Once you have signed up you will find **"My Young's Equipment account"** in the top right corner of our homepage at [www.youngs.ca](http://www.youngs.ca). That is your permanent access point to your MyYoungsEquipment portal.

# GOING DIGITAL? HERE'S HOW TO CHOOSE THE RIGHT PLATFORM FOR YOUR FARM

If you've decided it's time to enter the digital farming world and feel a bit daunted by the array of choices, you're not alone. Every farm is different so it's important to have a clear idea of what your farm needs from a digital platform. Here are some key considerations as you evaluate digital products and their fit for your operation.

## **Think about what you want to learn from your data**

Data is the powerhouse behind digital farming platforms but the sheer volume of it can be overwhelming. The key is to clearly understand what you want to do with your data so that you can direct its power more effectively.

"You have to identify what pain point you're trying to solve," says Marvin Talsma, Global Scripting Manager with FieldView™. "If you don't know that, it's hard to go through all of that data meaningfully." For example, you may want to understand which varieties perform better on your farm. Or perhaps you want to better understand if in-crop applications are giving you a return.

The more robust your data set, the more precise the answers will be, which means you want a platform, like FieldView, that will bring all your data (real-time and historical) into one place where it can be easily managed to help identify solutions to the specific problems you're trying to solve. It's about making better, data-driven decisions for your farm.

## **Find a platform that will give you deeper insights into your agronomic practices**

Ultimately, you want a platform that will help you to accurately identify what practices are working and what practices may need some adjustment.

"When I think of where to start, you need a base layer and you build from there," says Talsma. He suggests you can begin establishing that baseline by getting past seasons' data into the system, then analyze that data to start your planning process.

In FieldView, you can easily upload historical data like planting, as applied, and harvest data from your equipment monitors using data inbox. If you have it, you can also upload historical field boundaries, soil data and more to gain even deeper insights as to what's working, where and how.

## **Choose a system that will grow with you**

Look for a platform that is simple enough to get you started easily, and robust enough to grow with you.

For example, with FieldView you may start out using historical harvest data to analyze yields – it's easy to do, easy to understand and helps you get comfortable using the technology. But when you want to start incorporating planting data, running variety trials, or taking full advantage of modern variable-rate-capable equipment, you need a platform – like FieldView – that can handle that too.

## **Work with the technology you already have**

Two important considerations when choosing a digital farming platform are how well will it integrate with your existing technology, like yield monitors or farm management software, and how easy is it to access and utilize your data.

In terms of integration, FieldView is partnered with equipment manufacturers, farm software companies, soil test labs, mapping providers and more, and is continuously seeking new partners. It means seamless data integration for better actionable insights from field to office.

And FieldView's commitment to data privacy is paramount. You own your data, FieldView does not sell it, and you alone determine who you share your data with and when – your agronomist, retailer, farm partners, it's up to you.

## **Start putting your data work for you**

You have a lot of farm data already – in spreadsheets, notebooks, equipment monitors and more. With FieldView, you can gather all of it into one place, and then analyze it to make even better decisions going forward. Whether it's through scripting tools, weather and scouting tools, Field Health Imagery or Crop Performance Analysis, FieldView helps farmers continuously improve input optimization, save time and improve productivity across the farm.

# POLY FITTINGS & FILTERS

Glass-reinforced polypropylene components from Banjo are light weight, chemical and corrosion resistant, and resistant to impact and stress cracking.

**REPLACEMENT FILTER**  
 # SUPER-FLO-FOAM - \$ 39.99  
 # SUPER-FLO-MESH - \$ 69.99

**4" ADAPTER**  
 Allows you to hook two 3 inch filters together.  
 # SUPER-FLO-4 - \$ 130.00

**TECH TIP**  
 Don't forget your check valve, cam locks and hose/clamps for your new dugout filter.

**2 INCH DUGOUT FILTER**  
 # SUPER-FLO-2 - \$ 189.99

**3 INCH DUGOUT FILTER**  
 # SUPER-FLO-3 - \$ 225.00

Super-Flo Filters, available in 2" and 3" size, are essential to the work with your dugouts and are ideal to fill your Sprayer tanks. They are rated over 4000 gallons per hour. Adapters for your filter to pump hookup or to connect two Super-Flo filters as well as foam replacement filters round up this vital product line.

Replacement mesh and foam are available. Replacement foam filters will work on either two or three inch filters.

# BOOM RECIRCULATION KIT & RAM MOUNTS

## SPRAYER BOOM RECIRCULATION KIT

Boom Recirculation uses add-on hardware to aid in efficient clean out of the boom and plumbing system. By circulating liquid from the outside tip of the boom and back to the center section, product settling is reduced and waste is eliminated.

See your Local Young's Equipment Parts/Service Department for Details

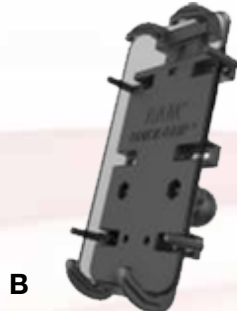

## RAM MOUNTS

RAM Mounts manufactures rugged and versatile mounting systems for cameras tablets and other mobile devices that can be attached nearly anywhere. Unlike other mounts on the market, RAM allows you to mount your devices where you need them. The unique design allows for quick installation, easy adjustments, strength, vibration dampening, and durability – all at a bargain price. RAM mounts are all backed by a lifetime warranty.

## 6 Reasons to use Synthetic Oil in Your Equipment

Has a mechanic or a parts person ever recommended the use of synthetic motor oil in your equipment? If so, they did it for a good reason. But, what's the difference? **What's your benefit of upgrading to synthetic oil?**

Here are six reasons why it makes total sense to choose synthetic oil over conventional oil for your fleet:

### Superior Lubrication

The molecules in synthetic oils flow freely and are perfectly round. While conventional oil molecules are still round, they don't move smoothly like in synthetic oil and differ in size. Due to the free movement, synthetic oil flows better, and is much more efficient in lubricating.

### Beat the Heat

The next reason is its capability to withstand heat. Conventional oils often suffer from thermal breakdown, which happens when they are exposed to high heat conditions. However, synthetic oils perform better, and are capable of resisting heat.

### Revitalizes Your Engine

Synthetic oils can actually help restore and revitalize the engines of older equipment. A high-quality, high-mileage synthetic oil like 10W40 can help revive the seals and gaskets in the engine, slowing down existing leaks and help prevent future leaks. It offers better protection for engine components, which is very important as equipment ages. Synthetic oil can even help clean out sludge left over from conventional oil, which helps clean pistons and other engine components and can even help improve fuel consumption.

### Longer Service Intervals

All oils 'break down' over time, significantly limiting their effectiveness. Synthetic oils generally don't need to be changed as often as conventional oils because they don't break down as quick. Even though the price of synthetic oil might be slightly higher than conventional oil, fewer oil changes means less money out of your pocket.

It makes perfect sense to upgrade to synthetic oil for your equipment. The benefits far outweigh the possible risks of conventional oil. If you use synthetic oil, you'll avoid engine deposits and many other risks that conventional oils deal with. Talk to our Parts or Service staff, we'll be happy to find the perfect synthetic oil specifically formulated to fit your equipment's engine and to deliver the best performance for your unique situation.

### Improved Stability

Stability in the synthetic oil game means viscosity. Over time, all oil tends to lose its thickness. Thin and runny oil can lead to "dry starts," which occur when your equipment has been sitting for a long period of time and the oil drains into the oil pan instead of sticking to the parts it's supposed to, causing the engine to run unprotected. Synthetic oil, with better viscosity, will stick better to all the engine parts for much longer periods of time than conventional oil.

### Improved Engine Life

Because synthetic oil is thinner compared to conventional oil, it minimizes the engine's work. This offers additional protection against premature wear, resulting in longer engine life. During the winter months, when it gets cold, conventional oil will thicken. Synthetic oil helps your engine work less, making it easier to start and build oil pressure faster even on the coldest mornings.

**VISCOSITY**

It's no wonder EGO is the #1 battery-powered platform in the industry according to leading consumer reports publications. Every tool in our platform delivers or exceeds the power of gas—without the noise, fuss, or fumes. Our patented ARC Lithium™ technology makes the EGO Power+ platform the most advanced in the industry. You get the power of gas and longer run times no matter which EGO tool you use. In every season, for any outdoor challenge, count on EGO tools to deliver the power, performance, and innovation you need.

All EGO POWER+ products come with a 5-year warranty on tools and a 3-year warranty on batteries. The warranty for commercial users is 2 years. See all the details on our website.

# CASE IH AFS ACCUSYNC

## AFS AccuSync

Work smarter, not harder, by connecting multiple machines in a field. With AFS AccuSync, you can ensure operators are working together efficiently by sharing coverage maps and A/B guidance lines for all seasons of use. With AFS AccuSync, you can:

- Enable section control based on operation coverage at the field level
- Gather more accurate data on tillage, planting, seeding, nutrient application, spraying and harvest
- Ensure parallel passes by all equipment
- Provide accurate yield maps where less-than-full swath is used
- Avoid skips and control overlaps
- Save money on costly inputs – Automatically prevent overseeding in previously planted areas.

### **Display Compatibility:**

Pro 1200 to Pro 1200

Pro 700 to Pro 700

Pro 700 to Pro 1200

**Talk to one of our After Sales support specialists about hardware and subscriptions needed for AFS AccuSync. AFS Connect account required.**

# KEEP TRACK OF YOUR OPERATION FROM ANYWHERE WITH THE AFS CONNECT™ FARM APP.

## USE THE AFS CONNECT FARM APP TO ACCESS THE FOLLOWING FEATURES:

- View the location and status of connected Case IH equipment, allowing you to **keep your operation running more efficiently**
- Share directions to fields and equipment to **coordinate refueling, seed tendering, and maintenance**
- **Log scouting records to track and share in-field findings** with others in your operation
- **View field data and share reports** directly from the app - keeping everyone you need in the know
- **Receive push notifications** and review machine history and status

### SCAN THE QR CODE TO DOWNLOAD:

1. Open the camera app on your cellular device.
2. Hover 2-3 seconds over the QR Code.
3. Download the AFS Connect Farm app and log-in with using your [My.CaseIH.com](https://my.caseih.com) Account.

# Seed Hawk – Unparalleled accuracy

The heart of the Seed Hawk Air Drill is the individually mounted opener assemblies. Each independent dual-knife opener and packer assembly delivers unparalleled accuracy in all soil conditions. The result is an excellent quality crop with maximum yield potential.

Learn how your farmland can reach its full potential at [vaderstad.com/ca-en](http://vaderstad.com/ca-en)

## Precision Openers

Seed Hawk's industry-leading opener assemblies operate independently for superior shallow seeding, depth accuracy, and optimal fertilizer placement. The result is quick, uniform germination, even packing, and consistent performance in all soil conditions.

Each opener assembly follows the ground independently by pivoting at the frame, controlled by its own adjustable hydraulic cylinder. A range of seed and fertilizer knives are available to suit every seeding style.

# Big machines that follow the contour

Seed Hawk Air Drills come in 5 or 7-plex frame sections, allowing them to follow the contours of the land. With a contour following range of 18" (46 cm), the independent opener assemblies deliver consistent seed depth regardless of the terrain.

## Wireless blockage monitoring

Product leaving the manifold bounces off a stainless-steel membrane as it enters the seed or fertilizer run, creating a small sound wave. If there is any change in the sound wave, if a blockage is detected, the wireless blockage system immediately delivers quick, accurate notification of the exact location to your iCon wireless control system. When a blockage location is identified, you can take your tablet out of the tractor cab and carry it with you as you locate the blockage and fix the issue. No more misses!

## Full control by 10 foot sections

Crop inputs are a substantial investment on every farm. Maximize the return on your investment by using Väderstad's precision farming technology to focus the product where it needs at the exact moment.

In the field, the Fenix III meters on the Precision Delivery Air Cart work seamlessly with the Seed Hawk Air Drill to allow full control of the output on each 10 foot section of the machine.

# DEVLOO ROTO SCRAPERS

## DEVLOO ROTO SCRAPERS

[www.rotomudscrapers.com](http://www.rotomudscrapers.com)

- Better emergence resulting in improved weed competition in all crops and better flea beetle control in canola.
- Properly placed fertilizer will not gas off into the atmosphere.
- Uniform crops at fungicide application time.
- Decreased green seed levels at harvest.
- Decreased fuel use due to less tire drag.
- Access fields in wetter conditions, reducing downtime and allowing an earlier start.
- Improves efficiency and increase yield.

### Fits:

- Vaderstad (Seedhawk)
- Bourgault
- John Deere
- Seed Master
- Versatile
- Morris
- K-Hart
- Amity

## ERIKS has Know-How

It's what you need – and exactly what you get from the leader in mission critical hose, sealing, belting and valve solutions.

You call it know-how. We call it essential.

Air Seeder Hose

Water/Chemical suction/

### Mosquito Barrier is a three pronged attack:

(1) It kills the adult mosquitoes. (2) The garlic coated plants keep mosquitoes out of the area. (3) It suffocates any mosquito larvae in standing water, under decks, or depressions in lawn.

**If there is NO STANDING WATER:** Mix 4 Oz of Mosquito Barrier into 1 Gal of water. Stir well and spray an hour before sundown.

**If there is STANDING WATER** - add canola oil to the mixture: For each gallon of water, add 4 ounces of Mosquito Barrier plus 2 ounces of Canola Oil and 1 TSP of liquid dish soap (non- scented) and spray before sundown.

# Mosquito Barrier®

# MB-1L - STARTING AT \$ 39.95

# CLEANFIX

*“For operators in conditions with high amounts of field debris, a reversing engine fan option clears the grill screen and cooling cores - so you’re always running under optimal conditions.”*

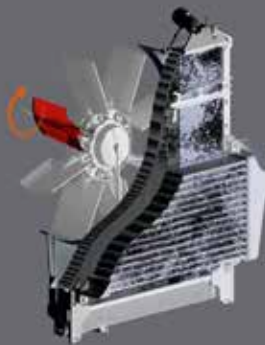

Proven in the dustiest, dirtiest working conditions throughout the world, Cleanfix reversible fans provide the most efficient diesel engine cooling and radiator cleaning available.

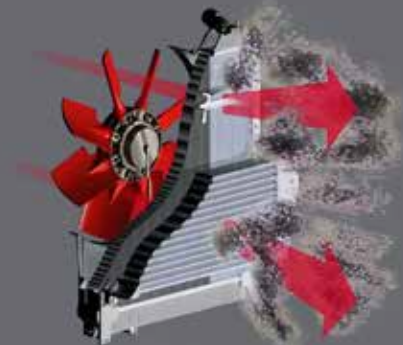

### Efficient Cooling

Cleanfix reversible fans are geared to the cooling requirements of your machine. This reduces the fan’s power consumption.

### Convenient Reversing

During operation at full speed, you activate reversal of the fan blades to the blow-out setting at the touch of a button.

### Effective Cleaning

Thanks to the optimal orientation of the blade profile, you benefit from strong cleaning air flow and cleaning pressure. Only this technology effectively cleans your radiator.

# PERFORMANCE — MATTERS — WHEN EVERY INCH COUNTS

## MEGA TOTE FUNNEL DRAIN OIL COLLECTION SYSTEM

The Tote-Top Mega Funnel is a giant funnel that sits on top of your IBC tote and allows you to quickly & easily pour fluid into your existing tote. It also allows you to leave all your supplies on top such as your pails, drain pan & filters so they can drip dry while the fluid is then funneled back into the tote. Made of HDPE, weights only 30 lbs, and fits 48" x 40" totes.

- Simply sits on top of tote and holds oil pans, funnels, filters, etc., so that oil can drain off into tote without a mess on the floor.
- Durable plastic design with metal screen on top & large center hole for oil to drain.

(PATRIOT SPRAYERS - ALL AIM COMMAND SYSTEMS) # 48143919 - \$ 31.92

## FENDER XTENDER™

### Features

- Four "easy-on, easy-off" fender extensions for narrow fenders
- Solid bolt-on connections
- Rugged polyethylene construction - no rusting or denting
- Install in less than 1 minute/fender with an impact wrench
- Minimal modification - extender brackets bolt on existing fenders
- Stackable for easy storage and handling

### Advantages

- Improved protection from mud when using wide tires
- Reduced nozzle damage
- Reduced labour and downtime in pressure washing
- Reduced field-to-field soil contamination
- Faster sprayer cleaning to manage clubroot
- Reduced risk of spreading soil-borne disease

### EXTENDED SERVICE PLANS

AVAILABLE FOR CUSTOMER OWNED EQUIPMENT UP TO 10 YEARS OLD

## PROTECTING EQUIPMENT INVESTMENTS

**Machinery Scope is a Leader in the equipment industry providing incredible value to the way people buy, sell, & manage their farm equipment. Machinery Scope offers inspections, extended warranty plans, and appraisals to make sure your investments are protected at all times.**

**Farm equipment is expensive and so are the unexpected breakdowns and repairs associated with owning and operating your machinery. Covering your equipment investments with an Extended Service Plan adds peace of mind, delivers value, and protects your bottom line.**

# Precision Delivery Air Carts – Smart, flexible

To bring the highest level of technology and precision to your farm, Väderstad has developed the Precision Delivery line of air carts.

With a wide range of innovative features like Acres to Empty, In-field Calibration, and Fit to Field, the iCon Wireless Control system provides you with more detailed real-time information, more automation, more customizable data, and optimized prescription mapping.

Learn how your farmland can reach its full potential at [vaderstad.com/ca-en](http://vaderstad.com/ca-en)

## Fill systems

The simple design of the Precision Delivery Air Carts allows you to spend less time in the yard and more time in the field. Easy to fill, easy to adjust and easy to clean out. Optional fill systems include conveyors, augers, bag lifts, and fill chutes.

### Precision Delivery Air Carts

## Individual bin load cells

Stopping to guess how much product you have left in the tank is a thing of the past. The modular tank design of Precision Delivery Air Carts features individual compartment load cells.

The load cells weigh each bin separately and provide real-time verification of remaining product. The iCon Wireless Control software uses the innovative Acres to Empty feature to calculate how many acres it will cover. This ensures more efficient filling times and allows you to pinpoint your required fill volume.

## iCon wireless control system

The iPad-based iCon wireless control system delivers complete and easy wireless control of your Precision Delivery Air Cart and Seed Hawk Air Drill, even when you are not in the cab.

## THE AccuMix™ AM 1000s

by Highline Manufacturing - A Division of Bourgault Industries Ltd.

**The AM 1000s** was designed to solve the challenges farmers face when feeding cattle in extreme conditions. It is solidly built, has exceptional visibility while unloading with Highline's unique front discharge, all wheel steering for tight spaces and with off-road capability there isn't the need for cemented or paved yards. While other machines are built for ideal conditions, this machine is truly . . . *Built For Here*™.

## NEW BP 660/661® Bale Pro®

by Highline Manufacturing - A Division of Bourgault Industries Ltd.

**NEW BP 660 BALE PRO®** - With many new enhancements this is a great option for cattle operations looking for a durable, well-engineered bale processor. The BP 660 Bale Pro® has a dual feed roller processing chamber with a centrally driven flail drum processor (pictured right). Expand your BP 660 by adding a Feed Chopper™ and Grain Tank.

**NEW BP 661 BALE PRO®** - Many new enhancements have been added to this model but unlike the BP 660 Bale Pro®, the 661 Bale Pro® has a slat and chain processing chamber with an offset flail drum. Expand your BP 661 by adding a Feed Chopper™ and Grain Tank.
